Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant argued the prior art did not disclose a high thermal and electrically conductive material. Examiner indicated because the prior discloses alternating low and high index layers having indium tin oxide and diamonds, it is expected for the low index layer to be highly thermal. In addition, Scalora teaches the material is a conductor of electricity (column 7, lines 50-67). The rejection is maintained for reasons of record.

(A fuller description, if necessary, and a copy of the amendments which the examiner agreed would render the claims allowable, if available, must be attached. Also, where no copy of the amendments that would render the claims allowable is available, a summary thereof must be attached.)
